SSCE3V322L1

1-line Bidirectional Micro Packaged TVS Diodes for ESD Protection

Description

The SSCE3V322L1 is a bi-directional TVS diode.It is designed with AF process TVS technology to protect voltage sensitive components from ESD. Excellent clamping capability, low leakage, and fast response time provide best in class protection on designs that are exposed to ESD. Because of its small size, it is suited for use in cellular phones, MP3 players, digital cameras and many other portable applications where board space comes at a premium.

It has been specifically designed to protect sensitive components which are connected to data and transmission lines from overvoltage caused by ESD(electrostatic discharge), and EFT (electrical fast transients).
